Unit 1 Lesson 1

Intro to Problem Solving

Resources
Activity Guide - Aluminum Boats

Goal
Build a boat that holds the most possible pennies, using a piece of aluminum foil. You will build two boats and will try to improve your design between the first and the second.

Rules
- You may only use a single piece of foil to build your boat
- You may not touch or adjust your boat once it is in the water
- You must add pennies one at a time

Develop a Plan
- What kind of boat does your group plan to make? Write a description or draw a picture below.
- What are the strengths of this design? What possible weaknesses might this design have?

Test Your Boat
- How many pennies did your boat hold?
- Why did your boat eventually sink? What needs to be improved?

Evaluate and Improve
- What are the most common kinds of problems you see among the boats tested?
- What ideas seem to be working well?
Develop a Plan
● What kind of boat does your group plan to make? Write a description or draw a picture below.

● What are the strengths of this design? What possible weaknesses might this design have?

Test Your Boat
● How many pennies did your group’s new design hold?

● Why did your boat eventually sink? What needs to be improved?

Reflect
● How did working in a team make this activity easier?

● How did it make the activity more challenging?

● What helped your group overcome these challenges?
Unit 1 Lesson 2

The Problem Solving Process

Resources
Activity Guide - The Problem Solving Process

The Problem Solving Process
Having a strategy for approaching problems can help you develop new insights and come up with new and better solutions. This process is generally useful for solving all kinds of problems.

- **Define**
  - What problem are you trying to solve?
  - What are your constraints?
  - What does success look like?

- **Prepare**
  - Brainstorm / research possible solutions
  - Compare pros and cons
  - Make a plan

- **Try**
  - Put your plan into action

- **Reflect**
  - How do your results compare to the goals you set while defining the problem?
  - What can you learn from this or do better next time?
  - What new problems have you discovered?

What it Looks Like
You’re going to list the strategies and processes you and your classmates already use for each step in this process. Fill out the tables below for each of the three problems.

**Building Challenge**
For each step in the Problem Solving Process list the parts of this activity you believe fall within that step

- **Define**

- **Prepare**

- **Try**

- **Reflect**

What strategies did you use in solving this problem that could help you solve other problems?
A Problem You Are Good at Solving
You should have brainstormed a type of problem that you’re good at solving. Write down the steps of your process that you believe fall into each step of the Problem Solving Process.

Type of Problem: ________________________________

- Define

- Prepare

- Try

- Reflect

What strategies do you use in solving this problem that could help you solve other problems?

A Problem You and a Classmate Want to Get Better at Solving
Find a classmate and talk to figure out a type of problem you both could get better at solving. Fill out the questions below with strategies or steps you would want to use to try to solve this problem using the problem solving process.

Type of Problem: ________________________________

- Define

- Prepare

- Try

- Reflect

What strategies could you use in solving this problem that could help you solve other problems?
Unit 1 Lesson 3

Exploring Problem Solving

Resources
Activity Guide - Using the Problem Solving Process

Word Search

Overview
Working with a team find the following words in the grid. They may be horizontal, vertical, or diagonal in any direction.
DEFINE, PREPARE, TRY, REFLECT, PROBLEM, SOLVE, COMPUTER, SCIENCE

Objective
Find and circle all 8 words as quickly as you can!

Once You're Done
Head to the last page of the activity guide and fill in the row there for the "Word Search" in the table.
Birthday Guests

Overview
A big group of 15 guests is getting together at a restaurant for a birthday. The restaurant has 3 tables that can each seat only 5 people. Below you can find some information about the people who are attending the party.

Aysha, Ben, Carla, Damien, Eric, Fan, Genaro, Hannah, Isaias, Jessica, Kyla, Laila, Max, Nazek, Owen

<table>
<thead>
<tr>
<th>Close Friends (Try to put them together)</th>
<th>In a Fight (Try to keep them apart)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aysha and Damien</td>
<td>Aysha and Genaro</td>
</tr>
<tr>
<td>Max and Isaias</td>
<td>Ben and Hannah</td>
</tr>
<tr>
<td>Nazek and Laila</td>
<td>Fan and Max</td>
</tr>
<tr>
<td>Owen and Genaro</td>
<td>Damien and Laila</td>
</tr>
<tr>
<td>Ben and Jessica</td>
<td>Isaias and Owen</td>
</tr>
<tr>
<td>Genaro and Eric</td>
<td>Kyla and Jessica</td>
</tr>
</tbody>
</table>

Objective
Find the best possible arrangement of guests at the party. Draw your solution in the space below. To help you can cross out the letters of the names you’ve assigned in the row below.

Once You’re Done
Head to the last page of the activity guide and fill in the row there for the “Birthday Guests” in the table.
## Redesign Your Classroom

### Overview
You and your friends will be redesigning your classroom. You’ve only have one school day to make it happen, but otherwise how you plan goes it up to you. Plan the best looking classroom that you can!

### Develop Goals
Talk with your group for a few minutes. What are the most important things about the classroom? Can everyone see the teacher? How will you move everything? Write down the goals you’ll use to decide what makes a good plan.

<table>
<thead>
<tr>
<th>Goals</th>
<th>How My Plan Helps Reach this Goal</th>
</tr>
</thead>
<tbody>
<tr>
<td>Everyone can still see the teacher</td>
<td></td>
</tr>
<tr>
<td>Everyone should be able to ________</td>
<td></td>
</tr>
</tbody>
</table>

### Make a Layout
Every member of your group should separately start designing a layout. You should select what should go where and make sure it all fits in the room. For each goal your group chose, list how your layout helps to reach it in the right column. In the space below draw or describe your redesigned classroom.

**New classroom design:**
Share Your Layout and Get Feedback
Share the layout you developed with your teammates and explain why you think it is the best possible layout given the goals you chose. Afterwards, record their feedback and reactions to your design in the space below. Is there anything that needs to change? How could your layout improve?

Improve and Finalize
Using the feedback from your teammates update your layout. In the space below, write down the new design that you and your group agreed on.

Redesign

Once You’re Done
Head to the last page of the activity guide and fill in the row there for the “Redesign Your Classroom” in the table.
## Problem Solving Process Notes

### Reflecting on Using the Process
How did you use each step of the problem solving process to solve this problem? Give examples of what each step looked like as you were solving that problem.

<table>
<thead>
<tr>
<th>Define</th>
<th>Prepare</th>
<th>Try</th>
<th>Reflect</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Word Search</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Birthday Guests</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Redesign Your Classroom</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### The Purpose of Each Step
For each step in the problem solving process, write one sentence explaining its purpose. Why is it included in the problem solving process?

**Define:**

**Prepare:**

**Try:**

**Reflect:**

### Defining Problems with Questions
Before starting to solve a problem it’s important that you have defined it well. What questions or strategies can you use to better define or understand a problem? Record them in the space below.
Unit 1 Lesson 4

What is a Computer?

Resources
Cut out the following pictures and attach them to your poster
Activity Guide - What Is A Computer? [Set A]

Cut out the following pictures and attach them to your poster
Unit 1 Lesson 5

Input and Output

Resources
## Activity Guide - Input and Output

### Key Vocabulary:

**Input** - the information computers get from users, devices, or other computers  
**Output** - the information computers give to users, devices, or other computers

### Pet Chooser

Try out the pet chooser app a few times to see how it works. What are its inputs and outputs?

<table>
<thead>
<tr>
<th>Inputs</th>
<th>Outputs</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### Story Creator

Now try the story creator app a few times. What are its inputs and outputs?

<table>
<thead>
<tr>
<th>Inputs</th>
<th>Outputs</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### Your App Idea

With your partner, think of a new app idea. What does the app do? What inputs and outputs does it need?

<table>
<thead>
<tr>
<th>What it does</th>
<th>Inputs</th>
<th>Outputs</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Other Inputs

So far, all of the input that we have seen comes directly from the user. With your partner, brainstorm other ways an app might get the information that it needs.

1. ____________________________________________________________
2. ____________________________________________________________
3. ____________________________________________________________
4. ____________________________________________________________

Improved Pet App

Try out the improved version of the pet app that gives the user information about pet stores close by, which uses new sources of input. Determine the information that the app gets from each source of input.

<table>
<thead>
<tr>
<th>User</th>
<th>Phone Sensors</th>
<th>Internet</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Your App Idea

How could you use other sources of input to improve your app idea?

______________________________________________________________________________________
______________________________________________________________________________________
______________________________________________________________________________________
______________________________________________________________________________________
______________________________________________________________________________________
Unit 1 Lesson 6

Processing

Resources
## Activity Guide - Apps with Processing

### Key Vocabulary:

**Processing** - The thinking work computers do to turn input into output.

### Apps and Processing

For each app, choose one type of processing it uses and explain how it helps turn the input into output.

<table>
<thead>
<tr>
<th>App Name</th>
<th>Type of processing</th>
<th>How does it help turn input into output?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Is It Your Birthday?</td>
<td>if/then</td>
<td>If the birthday is today, then it shows the happy birthday message.</td>
</tr>
<tr>
<td></td>
<td>counting</td>
<td></td>
</tr>
<tr>
<td></td>
<td>finding a match</td>
<td></td>
</tr>
<tr>
<td></td>
<td>comparing</td>
<td></td>
</tr>
<tr>
<td>National Park Quiz</td>
<td>if/then</td>
<td></td>
</tr>
<tr>
<td></td>
<td>counting</td>
<td></td>
</tr>
<tr>
<td></td>
<td>finding a match</td>
<td></td>
</tr>
<tr>
<td></td>
<td>comparing</td>
<td></td>
</tr>
<tr>
<td>How many countries...?</td>
<td>if/then</td>
<td></td>
</tr>
<tr>
<td></td>
<td>counting</td>
<td></td>
</tr>
<tr>
<td></td>
<td>finding a match</td>
<td></td>
</tr>
<tr>
<td></td>
<td>comparing</td>
<td></td>
</tr>
<tr>
<td>My Famous Birthday</td>
<td>if/then</td>
<td></td>
</tr>
<tr>
<td></td>
<td>counting</td>
<td></td>
</tr>
<tr>
<td></td>
<td>finding a match</td>
<td></td>
</tr>
<tr>
<td></td>
<td>comparing</td>
<td></td>
</tr>
<tr>
<td>Stamp Notebook</td>
<td>if/then</td>
<td></td>
</tr>
<tr>
<td></td>
<td>counting</td>
<td></td>
</tr>
<tr>
<td></td>
<td>finding a match</td>
<td></td>
</tr>
<tr>
<td></td>
<td>comparing</td>
<td></td>
</tr>
</tbody>
</table>
**More Processing**

For each app, choose two types of processing it uses and explain how they help turn the input into output.

<table>
<thead>
<tr>
<th>App Name</th>
<th>Type of processing (choose two)</th>
<th>How do they help turn input into output?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fastest Finger</td>
<td>if/then counting, finding a match, comparing</td>
<td></td>
</tr>
<tr>
<td>Guess the Number</td>
<td>if/then counting, finding a match, comparing</td>
<td></td>
</tr>
<tr>
<td>Where should I live?</td>
<td>if/then counting, finding a match, comparing</td>
<td></td>
</tr>
</tbody>
</table>

**Your App Idea**

With your partner, think of a new app idea. What inputs does it need? What outputs? What types of processing does it use to change the input to output?

<table>
<thead>
<tr>
<th>App idea</th>
<th>Inputs</th>
<th>Outputs</th>
<th>Types of processing</th>
<th>How processing turns helps turn input to output</th>
</tr>
</thead>
</table>
Unit 1 Lesson 7

Storage

Resources
### Activity Guide - Apps with Storage

**Key Vocabulary:**

**Storage** - Information that is saved for the computer to use in the future

**Sample Apps**

#### Outfit Picker

What information should be **stored**?

<table>
<thead>
<tr>
<th>Information</th>
<th>Should it be <strong>stored</strong>?</th>
<th>Why? Or why not?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Favorite color</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Season</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Weather</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

#### Friend Finder

<table>
<thead>
<tr>
<th>Information</th>
<th>Should it be <strong>stored</strong>?</th>
<th>Why? Or why not?</th>
</tr>
</thead>
<tbody>
<tr>
<td>List of friends</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Friend locations</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Friend requests</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Choose a Kids Movie

What information should be stored?

<table>
<thead>
<tr>
<th>Information</th>
<th>Should it be stored?</th>
<th>Why? Or why not?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Favorite movie</td>
<td></td>
<td></td>
</tr>
<tr>
<td>What are you in the mood for?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Do you want an animated movie?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Recommendation</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Guidelines**

Now that we’ve seen some examples of input that should and should not be stored, brainstorm at least two guidelines about what types of information should and should not be stored. Your guidelines should follow this format:

“If the information ________________, then that information (should / should not) be stored because ________________. For example, _______________ (should / should not) be stored.”

1. ___________________________________________________________
   ___________________________________________________________
   ___________________________________________________________
   ___________________________________________________________

2. ___________________________________________________________
   ___________________________________________________________
   ___________________________________________________________
   ___________________________________________________________
Unit 1 Lesson 8

Project - Propose an App

Resources
Project Guide - Apps and Problem Solving

Overview

Computer science is an extremely powerful tool for solving real world problems. For this project you will combine what you’ve learned about the problem solving process and the way computers work in order to propose an app that could help solve a real world problem of your choosing.

You will...

● Work with a partner
● Define a real world problem
● Brainstorm ways an app could be used to help solve that problem
● Identify the inputs / outputs / storage / processing used by your app
● Share your ideas with another group for peer feedback
● Incorporate feedback to create a final version of the app
● Create a poster of your app to share with the class

You will submit...

● This completed Project Guide
● Completed Peer Review
● A poster of your app

Project Steps

Step 1: Find Your Partner
This project will be completed in pairs. List your partner’s name here: __________________________

Step 2: Brainstorm Problems
Brainstorm interesting and personally relevant problems. Nothing is off limits, and don’t worry yet about how computer science can help solve the problem. You might think about

● Things you’d like to improve in your school, neighborhood, or community
● A task in your everyday life that you wish could be completed more easily
● A cause that you feel strongly about
● Something that is currently inconvenient or annoying to do

Record your brainstorm of problems in the space below.
Step 3: Choose Your Problem
Work with your partner to decide on which problem you would like to work on. As you discuss, make sure you consider the following criteria.

- **Interesting**: Both group members are interested in the problem
- **Well-Defined**: You can explain who specifically the problem affects, what needs to change, and how you’ll be able to tell that the problem had been solved
- **Computing is Relevant**: The problem is an “information problem” that can be solved with “thinking work.”

Step 4: Define Your Problem

1. **What is the problem?** Be as specific as possible. What needs to change or improve? Why does the problem exist? You may need to narrow your problem’s focus. Making big changes begins with small steps!

2. **Who does the problem affect?** Be as specific as possible. Think about the age, location, life conditions, interests, background, etc. of your audience.

3. **How will you be able to tell that a solution to this problem has worked?** Be as specific as possible. What would you need to measure or observe to know the problem was solved?
Step 5: Your App
From a high level think about how an app could be used to solve a part of the problem you identified. What features would it need to have? How would someone use it? If you need to update your problem definition above then do so.

Name Your App: _____________________________________________________________

What does your app do? Write a short description of your app as though you were describing it to someone you’d want to use it. What does it do? Why would someone want to use it? How does it help solve the problem?

____________________________________________________

____________________________________________________

____________________________________________________

Step 6: Input, Output, Store, Process
You will sketch a version of your app and indicate what all the different outputs are. A classmate should be able to tell how the app works based on the sketch and labels.

App Sketch: Sketch what a screen of your app will look like based on your description above.

Output Information: Label the different outputs generated by your app by writing what they are and drawing an arrow to where they are located on the screen. (E.g. “List of nearby parks” or “Days until friends’ birthdays”)
**Inputs:** What kind of information does your app need as input to work? Will this input come from the user, phone sensors, or an external source (e.g. a database online)? List every piece of information your app will need to work. Your app may have more or less than 6 inputs. Feel free to add extra sheets of paper if you need them.

<table>
<thead>
<tr>
<th>Type of Information</th>
<th>Source</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>Example: User age</td>
<td>User / Sensor / External</td>
<td>Example: 13 years old</td>
</tr>
</tbody>
</table>

**Process:** What sort of processing will your app use?

**Store:** What information will your app store permanently?
Step 7: Peer Review
Your teacher will provide you with a Peer Review sheet. Trade projects with another group and complete the peer review. As part of this process you should develop new ideas for how you can improve your app.

Step 8: Finalize App and Make Poster
Based on the results of your peer feedback, make any additions or changes you need to make to how you defined your problem or how you describe your app. Then make a poster that presents the final version of your app. Your poster needs to include the following information.

- The name of your app
- The target audience
- The problem the app is designed to solve
- The input information the app uses
- A drawing of the output the app produces
- A description of how the app processes and stores information

To create your poster you can and should use your work from this project guide.

Step 9: Present Your App
The last step of this process is to present your app to your classmates. This may be done as a gallery walk or a class presentation. As you present your app make sure you’re ready to talk to your classmates about the following points.

- How you defined the problem your app is designed to solve and why you decided on this specific set of people, problems, and ways of measuring success.
- How your app is designed to work and how it aims to solve the problem.
- An overview of the information your app uses as input and output.
- An overview of how information would need to be stored or processed by your app.
- One change you made to your project based on the feedback you received
<table>
<thead>
<tr>
<th>Key Concept</th>

Unit 1 Lesson 9

Intro to Problem Solving - Newspaper Table (Alternate Lesson 1)

Resources
Activity Guide - Newspaper Table

Goal
Build a table that can hold as many books as possible, using only newspaper and tape. You will build two tables and will try to improve your design between the first and the second.

Rules
● You may only use only the newspaper and tape that your teacher gives you.
● Your table must hold the books at least one foot (or 30 cm) off the ground.
● You may not touch or adjust your table while you are adding books.
● You must add books one at a time.

Develop a Plan
● What kind of table does your group plan to make? Write a description or draw a picture below.

● What are the strengths of this design? What possible weaknesses might this design have?

Test Your Table
● How many books did your table hold?

● Why did your table eventually fall? What needs to be improved?

Evaluate and Improve
● What are the most common kinds of problems you see among the tables tested?

● What ideas seem to be working well?
Develop a Plan
- What kind of table does your group plan to make? Write a description or draw a picture below.
- What are the strengths of this design? What possible weaknesses might this design have?

Test Your Table
- How many books did your group’s new design hold?
- Why did your table eventually fall? What needs to be improved?

Reflect
- How did working in a team make this activity easier?
- How did it make the activity more challenging?
- What helped your group overcome these challenges?
Unit 1 Lesson 10
Intro to Problem Solving - Spaghetti Bridge (Alternate Lesson 1)

Resources
**Goal**
Build a bridge that holds the most possible books, using spaghetti. You will build two bridges and will try to improve your design between the first and the second.

**Rules**
- You may only use the spaghetti and the glue that your teacher gives you.
- The bridge must cross a one foot (or 30 cm) gap.
- You may not touch or adjust your bridge once the books are on it.
- You must add books one at a time

**Develop a Plan**
- What kind of bridge does your group plan to make? Write a description or draw a picture below.
- What are the strengths of this design? What possible weaknesses might this design have?

**Test Your Bridge**
- How many books did your bridge hold?
- Why did your bridge eventually break? What needs to be improved?

**Evaluate and Improve**
- What are the most common kinds of problems you see among the bridges tested?
- What ideas seem to be working well?
Develop a Plan
● What kind of bridge does your group plan to make? Write a description or draw a picture below.

● What are the strengths of this design? What possible weaknesses might this design have?

Test Your Bridge
● How many books did your group’s new design hold?

● Why did your bridge eventually break? What needs to be improved?

Reflect
● How did working in a team make this activity easier?

● How did it make the activity more challenging?

● What helped your group overcome these challenges?
Unit 1 Lesson 11

Intro to Problem Solving - Paper Tower (Alternate Lesson 1)

Resources
Activity Guide - Paper Towers

Goal
Build a tower that goes as high as possible and can stand for at least 30 seconds, using sheets of paper. You will build two towers and will try to improve your design between the first and the second.

Rules
● You may only use the paper provided by your teacher to build your tower.
● You may not touch or adjust your tower once everyone lets go of it.

Develop a Plan
● How does your group plan to build your tower? Write a description or draw a picture below.

● What are the strengths of this design? What possible weaknesses might this design have?

Test Your Tower
● Did your tower stand for 30 seconds? How tall was it?

● What needs to be or can be improved?

Evaluate and Improve
● What are the most common kinds of problems you see among the towers tested?

● What ideas seem to be working well?
Develop a Plan
● How does your group plan to build your tower? Write a description or draw a picture below.

● What are the strengths of this design? What possible weaknesses might this design have?

Test Your Tower
● Did your tower stand for 30 seconds? How tall was it?

● What needs to be or can be improved?

Reflect
● How did working in a team make this activity easier?

● How did it make the activity more challenging?

● What helped your group overcome these challenges?
Unit 1 Lesson 12
Exploring Problem Solving - Animal Theme (Alternate Lesson 3)
Resources
Tangrams

Overview
Working with a team try to recreate the following images with the tan pieces.

Objective
Make the images as fast as you can!

Once You’re Done
Head to the last page of the activity guide and fill in the row there for the “Tangrams” in the table.
The Perfect Pet

Overview
A group of people are trying to decide what pet will best fit their needs and lifestyle. Try to match up the pets with the person who will work best with this pet, so that each person is matched with exactly one pet.

<table>
<thead>
<tr>
<th>Cat</th>
<th>Furry</th>

<tr>
<td>Fish</td>
<td>Kept in tank</td>
<td>Quiet</td>
<td>Needs water</td>
</tr>
<tr>
<td>Parrot</td>
<td>Furry</td>
<td>Noisy</td>
<td>Smart</td>
</tr>
<tr>
<td>Hamster</td>
<td>Furry</td>
<td>Kept in cage</td>
<td>Quiet</td>
</tr>
<tr>
<td>Iguana</td>
<td>Kept in tank</td>
<td>Quiet</td>
<td>Cold-blooded</td>
</tr>
<tr>
<td>Horse</td>
<td>Lives outside</td>
<td>Smart</td>
<td>Noisy</td>
</tr>
</tbody>
</table>

Objective
Given each person’s constraints, choose one pet for each person, so that each person gets a different pet.

<table>
<thead>
<tr>
<th>People</th>
<th>Constraints</th>
<th>Pet They Chose</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aysha</td>
<td>Wants a pet with fur</td>
<td></td>
</tr>
<tr>
<td>Ben</td>
<td>Wants a colorful pet that is also quiet</td>
<td></td>
</tr>
<tr>
<td>Carla</td>
<td>Doesn’t want to trap the pet in a cage or tank</td>
<td></td>
</tr>
<tr>
<td>Damien</td>
<td>Wants a pet that is smart</td>
<td></td>
</tr>
<tr>
<td>Eric</td>
<td>Wants a pet that doesn’t make a lot of noise</td>
<td></td>
</tr>
<tr>
<td>Fan</td>
<td>Allergic to fur and wants a smart pet</td>
<td></td>
</tr>
<tr>
<td>Genaro</td>
<td>Allergic to fur, wants to spend time outside with the pet</td>
<td></td>
</tr>
</tbody>
</table>

Once You’re Done
Head to the last page of the activity guide and fill in the row there for the “The Perfect Pet” in the table.
Plan a Pet Adoption Event

Overview
You and your friends will be planning an adoption event for animals in shelters. You have the entire school day to make it happen, and how you plan it is up to you. Plan the best adoption event that you can!

Develop Goals
Talk with your group for a few minutes. What are the most important things about this event? What pets will be up for adoption? How will people know about it? Where will it be held? Write down the goals you’ll use to decide what makes a good plan.

<table>
<thead>
<tr>
<th>Goals</th>
<th>How My Plan Helps Reach this Goal</th>
</tr>
</thead>
<tbody>
<tr>
<td>Must have pets that are ready for adoption.</td>
<td></td>
</tr>
<tr>
<td>Need enough people there to adopt most of the pets.</td>
<td></td>
</tr>
</tbody>
</table>

Make a Plan
Every member of your group should separately start creating a plan on how the event will work. You should select how you will let people know about it and where you will hold it at. Use the space below to explain what you should do to get ready for the event, and what the event will look like.

Getting Ready:

What it looks like:
Share Your Plan and Get Feedback
Share the layout you developed with your teammates and explain why you think it is the best possible plan given the goals you chose. Afterwards, record their feedback and reactions to your plan in the space below. Is there anything that needs to change? How could your plan improve?

Improve and Finalize
Using the feedback from your teammates update your plan. In the space below write down the new ideas that you and your group agreed on.

Getting Ready:

What it looks like:

Once You’re Done
Head to the last page of the activity guide and fill in the row there for the “Plan an Adoption Event” in the table.
## Problem Solving Process Notes

### Reflecting on Using the Process
How did you use each step of the problem solving process to solve this problem? Give examples of what each step looked like as you were solving that problem.

<table>
<thead>
<tr>
<th></th>
<th>Define</th>
<th>Prepare</th>
<th>Try</th>
<th>Reflect</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Tangrams</strong></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>The Perfect Pet</strong></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Plan an Adoption Event</strong></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### The Purpose of Each Step
For each step in the problem solving process write one sentence explaining its purpose. Why is it included in the problem solving process?

Define: __________________________________________
_______________________________________________________________________________________
_______________________________________________________________________________________

Prepare: __________________________________________
_______________________________________________________________________________________
_______________________________________________________________________________________

Try: __________________________________________
_______________________________________________________________________________________
_______________________________________________________________________________________

Reflect: __________________________________________
_______________________________________________________________________________________
_______________________________________________________________________________________

### Defining Problems with Questions
Before starting to solve a problem it’s important that you have defined it well. What questions or strategies can you use to better define or understand a problem? Record them in the space below.
Unit 1 Lesson 13
Exploring Problem Solving - Games Theme (Alternate Lesson 3)

Resources
Maze

Overview
You’ve lost all your softball gear! Starting from home base in the middle, collect all your gear located in other mazes!

Objective
Working with a team, start at the base in the middle of the maze and get to all of the other softball gear.

Once You’re Done
Head to the last page of the activity guide and fill in the row there for the “Maze” in the table.
Partner Race Relay

Overview
Aysha, Ben, Carla, Damien, Eric, Fan, and Genaro are a team in a partner race relay. For each round of the relay, two people run to the finish line holding a baton. Then one person runs back to return the baton to the starting line. The race ends when everyone is at the finish line.

Rules
Each player can run the race in a different amount of time, but when they run together, they can only go as fast as the slowest person. For example, in Round 1, Aysha and Ben take three minutes to get to the finish line, but Aysha only takes two minutes to return the baton to the starting line, for a total round time of five minutes.

<table>
<thead>
<tr>
<th></th>
<th>Aysha</th>
<th>Ben</th>
<th>Carla</th>
<th>Damien</th>
<th>Eric</th>
<th>Fan</th>
<th>Genaro</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>minutes</td>
<td>3</td>
<td>minutes</td>
<td>4</td>
<td>minutes</td>
<td>6</td>
<td>minutes</td>
</tr>
</tbody>
</table>

Objective
Decide what order the players should go in so that everyone gets to the finish line as fast as possible. Can they cross in an hour or less? 50 minutes? 45 minutes?

<table>
<thead>
<tr>
<th>Round</th>
<th>Who races?</th>
<th>Racing Time</th>
<th>Who returns?</th>
<th>Return Time</th>
<th>Round Time</th>
<th>Who is at the finish line?</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Aysha, Ben</td>
<td>3 minutes</td>
<td>Aysha</td>
<td>2 minutes</td>
<td>5 minutes</td>
<td>Ben</td>
</tr>
<tr>
<td>2</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>3</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>4</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>5</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>6</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Total Time: ________________________

Once You’re Done
Head to the last page of the activity guide and fill in the row there for the “Partner Race Relay” in the table.
Make a Game

Overview
Field day is coming up and you and your friends will be making a new, special game for it. You’ve got an entire school day to come up with a new game and its rules. Plan the most fun and exciting game that you can!

Explore Ideas
Brainstorm games you already know or look online for different ideas. Look at the different aspects of each game. Don’t worry about making a plan yet, but make sure you notice what you like and don’t like about the games.

Develop Goals
Talk with your group for a few minutes. What are the most important things about the game? How many people can play? What kind of game will it be? Write down the goals you’ll use to decide what makes a good plan.

<table>
<thead>
<tr>
<th>Goals</th>
<th>How My Plan Helps Reach this Goal</th>
</tr>
</thead>
<tbody>
<tr>
<td>Can be played at school.</td>
<td></td>
</tr>
<tr>
<td>Must take about ________ minutes.</td>
<td></td>
</tr>
</tbody>
</table>

Make a Game Plan
Every member of your group should separately start designing a game. You should select what should go where and make sure it all fits in the room. For each goal your group chose, list how your layout helps to reach it in the right column. In the space below describe the setup and materials needed for the game and how to play the game.

Setup/Materials

How to Play
Share Your Game Plan and Get Feedback
Share the game you developed with your teammates and explain why you think it is the best possible game given the goals you chose. Afterwards, record their feedback and reactions to your game in the space below. Is there anything that needs to change? How could your game improve?

Improve and Finalize
Using the feedback from your teammates update your game. In the space below write down the new design that you and your group agreed on.

Setup

How to Play

Once You’re Done
Head to the last page of the activity guide and fill in the row there for the “Make a Game” in the table.
**Problem Solving Process Notes**

**Reflecting on Using the Process**
How did you use each step of the problem solving process to solve this problem? Give examples of what each step looked like as you were solving that problem.

<table>
<thead>
<tr>
<th>Define</th>
<th>Prepare</th>
<th>Try</th>
