Unit 3 Lesson 1

Putting a STOP to Online Meanness

Resources
Directions
Read the story below and then work with a partner to answer the questions that follow.

Jada's parents let her play on a website where she can take care of a pet pony and decorate its stall. Her friend Michael has played with her in the past and knows her username and password. One day Jada goes to the site to care for her pony. She finds that her pony's stall is a mess and that there are some things missing.

1. What do you think happened? *I think ...*

3. What advice would you give Jada to respond to this situation? Remember S-T-O-P.

*Common Sense Education*

Shareable with attribution for noncommercial use. Remixing is permitted.
Pause & Think Moment
Draw a picture about what you should do if you experience someone being mean to you online.

Explain what you should do if you experience someone being mean to you online.

Unit 3 Lesson 2
Password Power-Up

Resources
Uh-Oh! If ... Then Scenarios

Directions

1. In your "home" group, read your assigned scenario and discuss what could happen if a password were stolen. Jot down your group's answer, and then wait for the teacher's instructions to switch to your "expert" group.

2. In your "expert" group, take turns sharing your "home" group's response. Complete your handout by taking notes on what each presenter shares.

Scenario 1

*Maya forgets her phone on the bus.* **IF** someone found it and figured out her password to unlock it, **THEN** what could happen?

Scenario 2

*Jared writes his email address in his notebook and leaves it open while he goes to the bathroom.* **IF** someone saw his email address and figured out his email password, **THEN** what could happen?
Uh-Oh! If ... Then Scenarios

Scenario 3
Kylie goes over to her friend Asia's house to play an online video game. After she leaves, her gaming profile is still saved. Asia’s little brother, Ben, turns on the game and sees it. IF Ben figured out Kylie's password, THEN what could happen?

Scenario 4
Thomas uses an app on his phone to pay bills from his bank account. IF someone figured out his password to the app, THEN what could happen?

Scenario 5
Beatrix logs in to her doctor's website to see medical information about herself. IF someone figured out her password to the website, THEN what could happen?
Uh-Oh! If ... Then Scenarios

Directions
1. In your "home" group, read your assigned scenario and discuss what could happen if a password were stolen. Jot down your group's answer, and then wait for the teacher's instructions to switch to your "expert" group.

2. In your "expert" group, take turns sharing your "home" group's response. Complete your handout by taking notes on what each presenter shares.

Scenario 1
Maya forgets her phone on the bus. IF someone found it and figured out her password to unlock it, THEN what could happen?

IF someone figured out her phone-unlock password, THEN they could see her messages, use her apps, and pretend to be her.

Scenario 2
Jared writes his email address in his notebook and leaves it open while he goes to the bathroom. IF someone saw his email address and figured out his email password, THEN what could happen?

IF someone figured out his email password, THEN they could see private emails he has sent and received, and they could pretend to be him online.
Uh-Oh! If ... Then Scenarios

Scenario 3
Kylie goes over to her friend Asia’s house to play an online video game. After she leaves, her gaming profile is still saved. Asia’s little brother, Ben, turns on the game and sees it. IF Ben figured out Kylie’s password, THEN what could happen?

IF Ben figured out her video game password, THEN he could pretend to be her online and hurt her reputation.

Scenario 4
Thomas uses an app on his phone to pay bills from his bank account. IF someone figured out his password to the app, THEN what could happen?

IF someone figured out his banking password (and username), THEN they could steal money from his account.

Scenario 5
Beatrix logs in to her doctor’s website to see medical information about herself. IF someone figured out her password to the website, THEN what could happen?

IF someone figured out her website password, THEN they could find out private health and medical information about her.
Power Up Your Password

Directions
Follow the steps to create your own strong password.

Practice Round

1. Start with a **phrase**. Think of a quote or group of words that will be easy to remember.  
   Example: There’s no way I’m kissing a frog.
2. Write down just the **first letter of each word** in the phrase.
3. **Capitalize** some of the letters.
4. Add one or two **memorable numbers**.
5. **Memorize** it. Repeat your new password in your head so it sticks.

Your Turn

1. Start with a **phrase**. Think of a quote or group of words that will be easy to remember.
2. Write down just the **first letter of each word** in the phrase.
3. **Capitalize** some of the letters.
4. Add one or two **memorable numbers**.
5. **Memorize** it. Repeat your new password in your head so it sticks.

Password Tips to Remember

- Start with a memorable _____________.
- Only your _______________ should know your password.
- Never use any _____________ identity information in your password.
- Create passwords with at least ___________ characters.
- Use letters, numbers, and _____________ in your password.

Programming with Angry Birds

Resources
Unit 3 Lesson 5

Debugging in Maze

Resources
Teachers play a vital role in computer science education and supporting a collaborative and vibrant classroom environment. During online activities, the role of the teacher is primarily one of encouragement and support. Online lessons are meant to be student-centered, so teachers should avoid stepping in when students get stuck. Some ideas on how to do this are:

- Utilize pair programming whenever possible during the activity.
- Encourage students with questions/challenges to start by asking their partner.
  - Unanswered questions can be escalated to a nearby group, who might already know the solution.
- Remind students to use the debugging process before you approach.
- Have students describe the problem that they’re seeing. What is it supposed to do? What does it do? What does that tell you?
- Remind frustrated students that frustration is a step on the path to learning, and that persistence will pay off.
- If a student is still stuck after all of this, ask leading questions to get the student to spot an error on their own.

**Teacher Tip:**

Show the students the right way to help classmates:

- Don’t sit in the classmate’s chair
- Don’t use the classmate’s keyboard
- Don’t touch the classmate’s mouse
- Make sure the classmate can describe the solution to you out loud before you walk away

You are going to create your own game using Play Lab.

1. Draw a star next to the actor that will be the player or hero. Circle all the other actors that will be in your game.

2. What is the setting of your game? Where will it take place? __Outside on the grass____

3. Draw your actors. Use arrows to show how they will move.

4. How will the player score points or win the game? __You get a point when you get the dog.____

5. How will the player lose points or lose the game? __You lose if you touch the witch.____
